

Title: Replication data for: The Impact of Being Surveyed on the Adoption of Agricultural Technology

Author: Mark Treurniet

Date: September 10, 2021

Files and directory structure

The files function in the following structure (blue files are provided through Dataverse, red files are created by do-file):

01 do-files/

- [analysis_impact_surveys.do](#) Do-file for this paper

02 survey/

- [Baseline Individual Farmers tool.pdf](#) Baseline (individual) survey
- [Baseline Group level tool.pdf](#) Baseline group survey
- [Group census tool.pdf](#) Group census survey

03 data/

- [impact_surveys.dta](#) Data for this paper

04 logs/

- [analysis_impact_surveys.pdf](#) Log file for this paper

05 graphs/

- [Graph 1 Proportion surveyed.png](#) Figure 1 (png-file)
- [Graph 1 Proportion surveyed.pdf](#) Figure 1 (pdf-file)

06 tables/

- [table_sample_sizes.xlsx](#) Table 1
- [table_impact.csv](#) Table 2
- [table_robustness_a.xlsx](#) Table 3, Columns 1-2
- [table_robustness_b.csv](#) Table 3, Columns 3-4
- [table_mechanisms.csv](#) Table 4
- [table_balance_primary_replacement.xlsx](#) Table 5
- [table_impact_market_linkage_for_impact_survey_sample.csv](#) Table 6
- [table_interaction.csv](#) Table 7
- [Tables.xlsx](#) Formats tables for paper

The main directory is set in line 10 of [analysis_impact_surveys.do](#).

Definition of variables

Group indicators

groupid	Group indicator
Treat_village	Village indicator
All_present	Farmer was present during the group census meeting (binary indicator)

Treatment indicators

baseline_sample	Actually surveyed at baseline
All_survey_status	Randomized survey status
considered	Actually considered for surveys (binary indicator; equals 1 for primary respondents as well as for replacement respondents if less than 6 farmers were surveyed from primary respondents and replacement respondents with lower rank, and 0 otherwise)
Treat_v_market_linkage	Randomized market linkage treatment status (binary indicator)

Dependent variables

adoption	Any Aflasafe purchased (binary indicator)
intensity_kg	Quantity of Aflasafe purchased in kg
BL_I_k2_afla_heard	Baseline survey question K2 (binary indicator)
a_BL_I_k3_afla_tell	Baseline survey question K.3 answer 1, 2, 3 or 4, or correct other specify (binary indicator)
a_BL_I_k4_afla_effects	Number of correct answers for baseline survey question K.4: answers 1-9 plus correct other specify

a_BL_I_k5_afla_prevent	Number of correct answers for baseline survey question K.5: answers 1-6 and 8 plus correct other specify
BL_I_k5_afla_prevent_1	Baseline survey question K.5 answer 1 (binary indicator)
BL_I_k6_afla_measure_1	Baseline survey question K.5 answer 1 (binary indicator)
BL_I_k7_aflasafe_heard	Baseline survey question K.7 (binary indicator)
a_BL_I_k8_afla_used	Baseline survey question K.8 (binary indicator, 0 if BL_I_k7_aflasafe_heard equals 0)
a_BL_I_a3name	Baseline survey enumerator indicator (anonymized)
a_Sale_a1foname	Sales enumerator indicator (anonymized; same value as in a_BL_I_a3name indicates same person)
BL_I_e1fertilizer	Baseline survey question E.1 row 1
BL_I_e5_maize_1	Baseline survey question E.5 row 1
EL_c1inorganic_fertilizer	Endline survey question C.1: Did you use inorganic fertilizer (CAN, DAP) on your maize field this season? 1=Yes 0=No 99=Did not plant any maize in the current season

Baseline survey variables used in Hoffmann et al. (2020)

age_resp	Baseline survey question B.6 row 1
edu_HH	Years of education completed by household head (based on baseline survey question B.7)
relation_head	Baseline survey question B.4 row 1 answer 1 (binary indicator)
assets	Sum of dummy variables indicating ownership in each asset listed in baseline survey section C.1 and C.2
land_maize	Baseline survey question D.2 converted to acres, Winsorized at 99%

maize_harvest	Baseline survey question G.2 converted to kgs, Winsorized at 99%
maize_market	Baseline survey question J.1 (binary indicator)
expenditure_total	Sum of expenditures on agricultural inputs in baseline survey question E.4 plus the sum of labor expenditures, for each category calculated as $E.8*(E.9+E.10)$. The total is Winsorized at 99%
social_capital	Sum of baseline survey questions K.10 and K.11 is above the project sample median (binary indicator)
knowledge_index	An index constructed as 0.6 times the z-score of the sum of dummy variables indicating correct or affirmative answers to baseline survey questions K.1, K.2, and K.3, plus 0.2 times the z-score of the number of correct answers to baseline survey question K.4 plus 0.2 times the z-score of the number of correct answers to baseline survey question K.5
insurance	Sum of baseline survey questions L.1, L.2 and L.3 (where L.3 was taken as 0 if the answer to L.2 was 0)
trust	Mean of: <ul style="list-style-type: none"> • 2/3 times the mean of: <ul style="list-style-type: none"> ○ the standardized ratio between baseline survey questions N.7 and N.6, ○ baseline survey question N.8 answer 1 (binary indicator); and • the standardized mean for baseline survey questions P.1.B, P.1.C, and P.1.D (where the scores were first reversed, so that 1=completely disagree, 5=completely agree).
qual_risk_aversion	Baseline survey question P.1.E minus baseline survey question P.1.F

Baseline controls used in Hoffmann et al. (2020)

Treat_v_bundled_insurance	Randomized bundled insurance treatment status (binary indicator)
---------------------------	--

All_present	Already defined above under <i>Group indicators</i>
All_sex	Proxy for gender based on name recorded during the group census meeting (binary indicator; 1 indicates females, and 0 indicates males)
age_resp_grp	Group mean of age_resp
edu_HH_grp	Group mean of edu_HH
relation_head_grp	Group mean of relation_head
assets_grp	Group mean of assets
land_maize_grp	Group mean of land_maize
maize_harvest_grp	Group mean of maize_harvest
maize_market_grp	Group mean of maize_market
expenditure_total_grp	Group mean of expenditure_total
social_capital_grp	Group mean of social_capital
knowledge_index_grp	Group mean of knowledge_index
insurance_grp	Group mean of insurance
trust_grp	Group mean of trust
qual_risk_aversion_grp	Group mean of qual_risk_aversion
county_1	Meru county (binary indicator)
county_2	Tharaka Nithi county (binary indicator)
county_3	Embu county (binary indicator)
group_capacity	Standardized mean of standardized values of: <ul style="list-style-type: none"> • baseline group survey question B.1.A; • baseline group survey question B.25; • the maximum of the following variables: <ul style="list-style-type: none"> ○ baseline group survey question B.8 answer 2 (binary indicator), ○ baseline group survey question B.8 answer 3 (binary indicator),

- baseline group survey question B.10 (binary indicator),
- group census survey question B.3 (binary indicator),
- group census survey question B.4 (binary indicator);
- baseline group survey question B.5 answer 1 (binary indicator);
- the mean of the standardized values of:
 - baseline group survey question B.9,
 - baseline group survey question B.17.

gender Ratio between baseline group survey questions B.1.b and B.1.a

Rain_trigger_vegetative_drought Rainfall indicator: insurance trigger for lack of rainfall during vegetative phase based on the GPS coordinates of the group meeting location

Rain_trigger_flowering_drought Rainfall indicator: insurance trigger for lack of rainfall during flowering phase based on the GPS coordinates of the group meeting location

Rain_trigger_ripening_excess Rainfall indicator: insurance trigger for excess rainfall during ripening phase based on the GPS coordinates of the group meeting location

Sample

impact_survey_sample Included in the randomization of survey statuses as described in the paper
